Azure DevTest Labs

Fast, easy, and lean dev-test environments in Azure.
Specifically for your team. On demand.

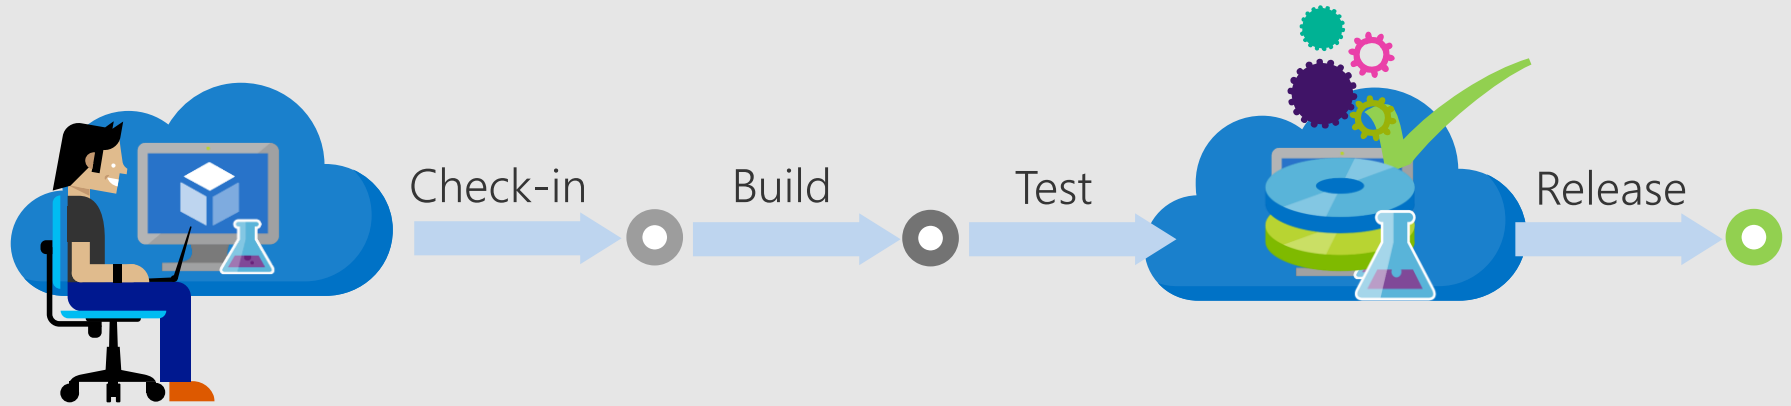

Regular VM vs DevTest VM

Developer Machines

Test Environments

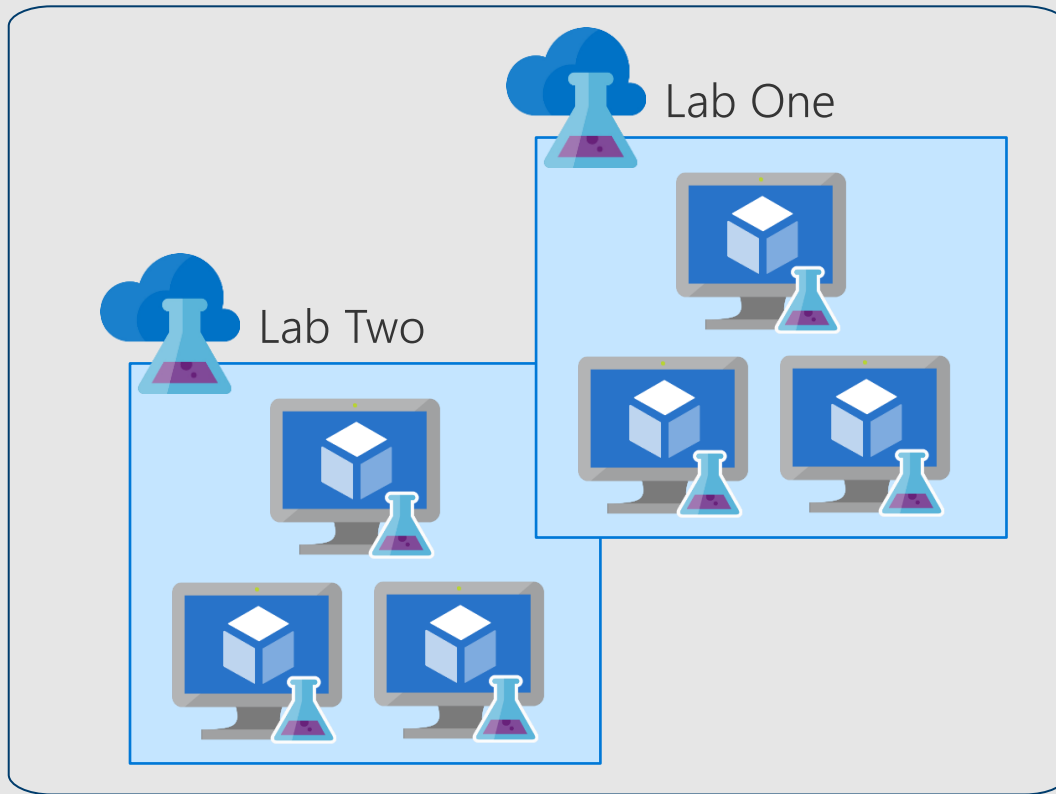

Training / Education

Trial / Hackathon / Demo

How it works currently

Your Subscription

How it works

User

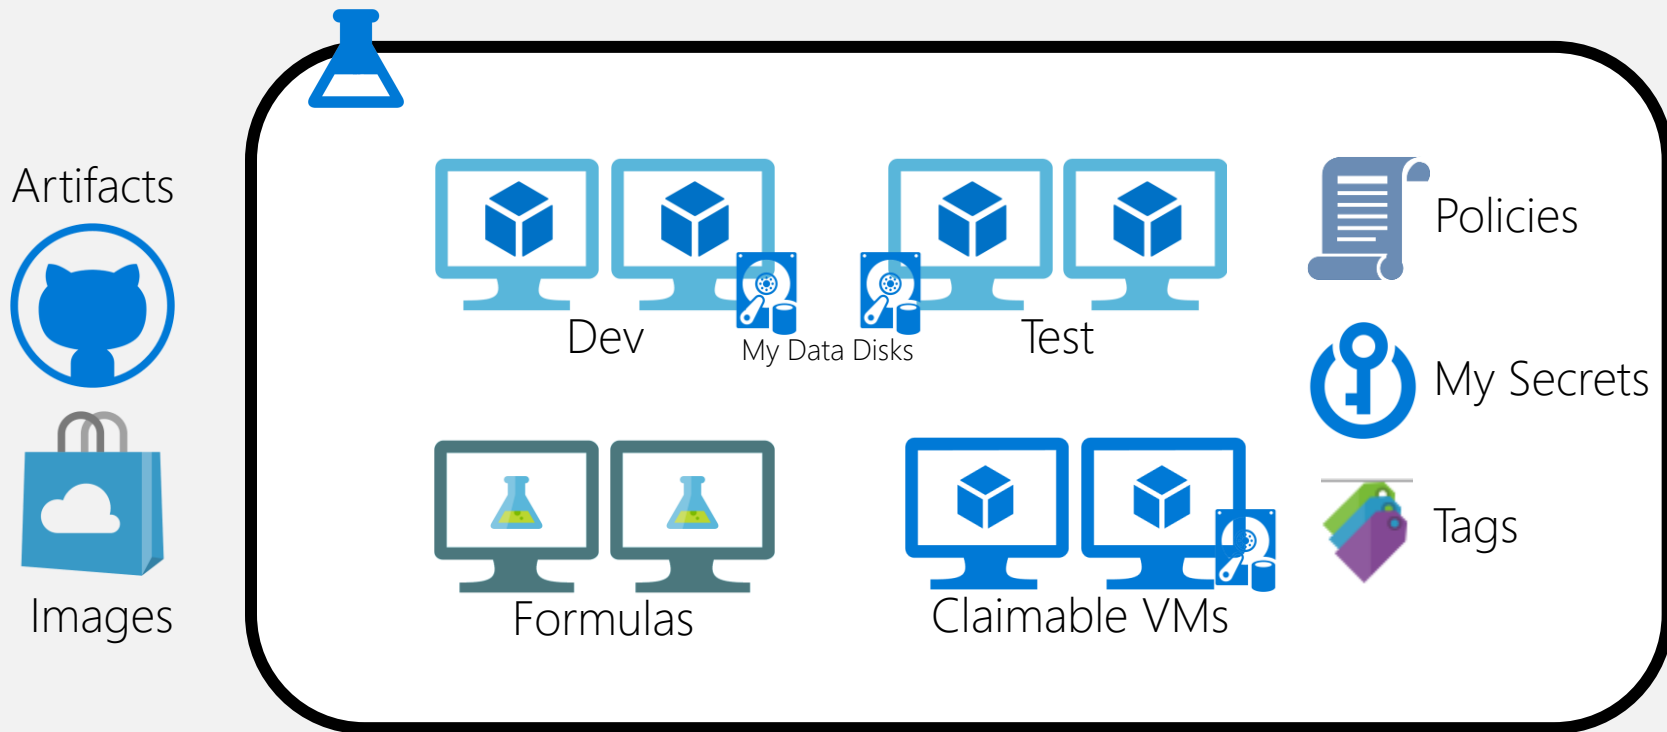

"Give me xxx VMs"

labs.azure.com

Azure Lab Services (D/T) - Components

Azure Lab Services – Lab Types

Managed Lab

- Classroom Labs
- Service managed infra and resiliency
- Requires Central Lab Account
- Not created in your sub
 - Created in internal MS subs
 - Auto-scaling
 - Usage tracked and billed to your sub
- RM deployment not available

Custom Lab

- Original Dev/Test labs
- You manage Infra and resiliency
- Created in your sub
- No sub auto-scaling
- RM deployments available

Demo's

Dev/Test Lab (DTL)

Managed Lab (ALS)

What's the Difference Between...

- > Custom Images (My Disks/BYO) and Formulas?
- > Artifacts and Formulas?
- > My Secrets and Key Vault?
- > Claimable VM and a VM?
- > An Visual Studio Sub* using Labs and any other?

Permissions, Roles, and Scopes

RBAC

Permission – access to a specific action -> read access to VMs

Role – Set of permissions grouped together -> Owner role has all access

Scope – A level within the hierarchy of a resource -> RG, lab, or entire sub

Roles within the Azure Labs Scope

Lab Owner – Access to all resources in lab

Lab User – Can view, but cannot modify

Custom – Grant access to specific Lab policies

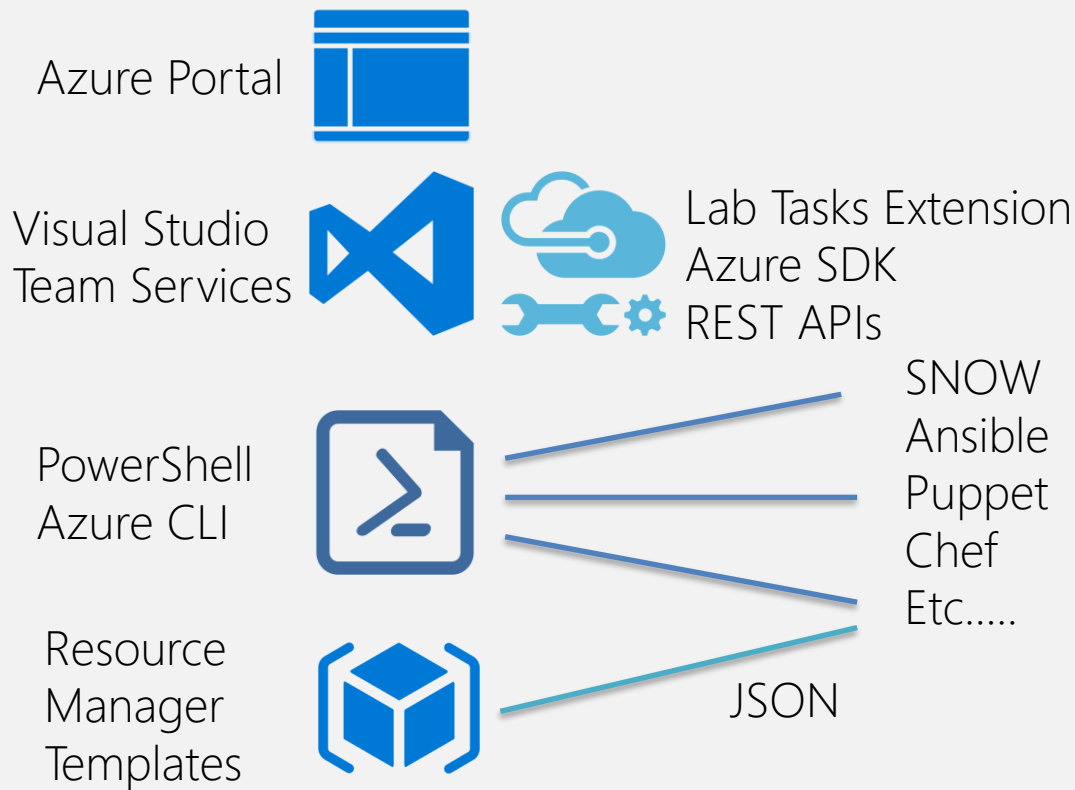

Notes

A Subscription owner inherits role of Lab Owner

Lab Owners cannot see anything outside of their Labs

Permissions propagate downward

Integration, Management, and Automation

Tips

Subscription Limits – Know before you deploy & maintain control

Use the auto-start/shutdown and expiration features

Use OMS, Cloudyn, Analytics, or your favorite tool to watch the spend

Automate, automate, automate... and then automate again

Use direct links to labs

ALS – NEVER change a VMs IP address

ALS – 1 VM per lab, No cost control, no refined wizards (very, very young)

Use meaningful naming & use Tags

Don't reinvent the wheel

The background is a dense field of dark grey, three-dimensional question marks. Two of these question marks are highlighted: one in the lower-left foreground is a bright yellow-orange, and another in the upper-right background is a bright cyan blue. Both glowing question marks have a soft, radial glow emanating from them.
